AMERICA HAS A SERIOUS NATIONAL SECURITY PROBLEM OWING TO THE DEMOCRATIC PARTY, WHICH HAS BEEN HIJACKED BY SOROS AND SON.

By Roger Morgan, Take Back America Campaign. www.tbac.us Aug 12, 2024

Roughly **1,000 people are dying everyday owing to drug related causes**, more than in any war in America history. It didn't happen by accident**. It is a result of 15 years of national drug policy called "Harm Reduction", created by George Soros and implemented because he has corrupted the Democratic Party ….. including Kamala Harris.** "**Harm Reduction** 1) **ignores prevention entirely; 2) Encourages use of marijuana and other drugs**; and 3) **Doesn't punish criminal behavior.** It all started in 2009 by the Obama Administration. Some results of this journey of death and destruction follow.

OVERDOSE DEATHS[i] – **Increased from 105/day to 300/day**. The market for marijuana has increased from less than 15 million to 52.5 million (NIDA). That created a vast new market for other drugs like fentanyl, to the delight of the cartels. If one takes an average increase of 100 victims a day, times 365 days, times 15 years, an estimated **547,500 additional overdose deaths** occurred over this period attributable to flawed national drug policies. And overdose isn't the only cause of death.

MASS SHOOTINGS/CANNABIS-INDUCED PSYCHOSIS (CIP)– With rare exception, almost all mass murders are caused by someone suffering CIP. **From 260 mass shootings in 2013 the number has grown to 655 in 2023**[ii]**, 1.8 a day.** There are **100 gun deaths a day** in the U.S., 25 times higher than other high income countries. The rise in potency (i.e. THC content) from about 5% to as high as 99% in condensates used in vaping, dabbing and edibles is a major cause of the problem.

SUICIDES – **From 36,909 (101/day) in 2009 to 49,303 (135/day) in 2023**.[iii] Marijuana is a major cause of suicidal ideation, obviously a factor in the record level of suicides.

PEDESTRIAN DEATHS- **Have increased from 4,109 in 2009 to 7,522 in 2022,** [iv] **a forty year high**[v]**.** Marijuana impaired drivers often focus on a person, or object, and drive at it. People are no longer safe on the sidewalk.

MENTAL ILLNESS AND ADDICTION – More Americans than ever are living with mental and emotional distress according to the World Health Organization. One third of homeless suffer from a major mental illness, including schizophrenia, bipolar, and major depression;[vi] 26% are addicted to drugs. Even low potency marijuana is harmful to users. People using today's high potency marijuana are a threat to others.

BRAIN DAMAGE – Marijuana is fat soluble with a half life of one month. It attaches to ever cell in the body, especially the 3 lb brain. Prior to the brain reaching full maturity at mid to late 20's, it is vulnerable to major harm from THC. It is age and dose related, much worse during adolescence. The known damage includes loss of white matter by up to 80% which is a cause of mental illness; potential loss of IQ by up to 8 points by mid-life, and stopping doesn't reverse the damage; shrinkage of the hippocampus, the learning, cognition and memory center of the brain. **Research indicates 43-44% of college and non-college young people aged 19-22 are using cannabis**, and roughly 31% of high school seniors. This does not bode well for their futures, nor ours as a nation.

DNA DAMAGE – Marijuana is an assault on humanity. In 1973, a cellular biologist named Dr. Akira Miroshima (Columbia U) stated ***"In my 20 years of research on human cells, I have never found any other drug, including heroin, which came close to the DNA damage caused by marijuana."*** He went on to say

that animals and plants have their own specific number of chromosomes in the nucleus of each cell. Humans have 46, with the exception of sperm and eggs, which have 23 each. He discovered that **one-third of "weekend smokers" who average just two joints a week had only 20 to 30 chromosomes, about the same as a frog**. Because there has been no attempt to raise awareness and enlighten the masses for 15 years, prospective parents are unaware of the mental and physical harms marijuana can inflict not only on a fetus, but their future line of children and grandchildren as well.

President Trump gave Soros and marijuana a pass during his last Administration but seems to have gained an awareness of the harms of today's highly potent cannabis products. If he wins the election, it is absolutely critical that the next Administration revamp drug policy based **first and foremost on prevention**. Reagan reduced drug use by 64% when he was in office. That needs to happen again.

George Soros, son Alexander, the Open Society Foundation and all those complicit in helping them need to be held accountable for all of their **Seditious Acts** to undermine American values; and for **Treason** leading to large scale loss of life. Aside from the human harms, the economic cost of substance abuse has been **estimated at $3.73 trillion[vii],** over four times the national Defense Budget.

The Biden Administration's call for rescheduling marijuana, and VP Harris's strong support for legalization ("*because it gives people joy"*[viii]) are clear evidence that they work for Soros, not the people. The money for personal or political gain is more important than the lives of all they have destroyed.

ABOUT THE AUTHOR - Roger Morgan has been engaged in drug prevention in California for roughly 30 years. He has been an entrepreneur in California since 1980. He was a VP of Volvo and CEO of Volvo Penta of America from 1973-1979, and prior to that served Caterpillar for 10 years in sales, marketing and administration primarily in Europe. He holds a BA of Business from Colorado College (1963) and Bachelor of Foreign Trade from Thunderbird Graduate School (1964). He is a non-combat veteran (1956 – 1962), a Christian and conservative.
